Taking Stock Meeting

June 17, 2010

Lum DB Modifications Pending

See Yannis' talk

replacement of half of Ibns in DB...

For CD: maintenance, not development

Speaker's Bureau DB

I believe all outstanding issues are resolved...
Igor has installed nice failover mechanism for
speaker's and trigger database
https issue resolved—thanks!

General Issues

Hope we have learned from disastrous migration last year

It is **COMPLICATED** interacting with CD

DBA's, system managers, applications separated
mapping of applications to machines: a web page?

Record scheduled AND unscheduled downtime
patches ~ quarterly, or more like monthly?

communication better

Have we recovered from power overrun in FCC?

Restart scripts better...

Status of d0db-prd forwarder?

Kerberizing

has this gone away?

Backups: should revive discussion?

3 more years? Should know in a month or so...

THANK YOU for help in DIFFs of db (SMT)!
